NEW?

About Our Course

The course covered various topics related to infectious diseases & infection control, including:

- Basic microbiology
- Isolation precautions, PPE & hand hygiene
- Emerging infectious diseases
- Prevention of MDRO and antibiotic usage
- Prevention of urinary tract infection, surgical site infection, catheter-associated blood stream infection & nosocomial pneumonia
- Equipment and environmental disinfection & sterilization
- Linen, wastes and specimen handling
- Immunization & occupational exposure
- Outbreak investigation & challenges of infection control

In 2023, HKICNA conducted two series of certificate courses on **Basic Infection Control for Nurses** in Jan-Feb and Sep-Nov and more than 160 students completed the courses.

PROF. LAI KOON-CHI, CHRISTOPHER
